SALE LOCATION:

Molitor Angus Ranch, 5 miles North, 2½ miles West of Zenda or 9 miles West, 9 miles South, 2½ West of Kingman – See map on back cover.

TRANSPORTATION:

Wichita Municipal Airport serves many major airlines, also the Kingman Airport has facilities for private airplanes. We will be happy to meet any flight on request.

SALES STAFF:

Col. Jerry Lehmann, Auctioneer..... 573-474-7230
(cell) 573-999-4759
Jeff Mafi, Angus Journal..... 816-344-4266
Tami McIntosh, DVAuction..... 402-316-5460
Jeff Hallowell, OK Stock Exchange 405-840-3915
Angus Hall of Fame..... 816-532-0811
Anne Lampe, Kansas Angus News 620-874-4273
Dakota Ferguson, Kansas Stockman & High Plains Journal..... 785-893-1684

ACCOMMODATIONS:

Copa Motel, east edge of Kingman, Kan., 1113 E. Hwy 54, 620-532-3118.

ASSOCIATION REPRESENTATIVES:

Jeff Mafi..... Regional Manager, American Angus Association
Anne Lampe..... Secretary, Kansas Angus Association
Stephanie Dickerson..... President, Kansas Angus Association
Cash Shilling..... Past President, Kansas Angus Association

GENERAL INFORMATION:

INSPECTION OF CATTLE: All sale cattle will be available for your inspection at the ranch. All cattle are freeze branded.

DNA INFORMATION: All cattle sell free of known genetic defects. A supplement sheet will be available at the sale for updated performance data. All bulls and females have been HD50K Tested.

HERD HEALTH: All cattle will be accompanied with proper health certificates. Cattle selling to surrounding states that require additional tests will be held and shipment will be scheduled later. All bulls will be semen tested and scrotal measured. Also, bulls and breeding-age females will be vaccinated with Preg Guard Gold FP10 and Poured. Safeguard wormer is used twice a year. All yearling cattle have a Feb 2026 treatment with Valbazen wormer. Negative test BVD.

TERMS AND CONDITIONS: The terms of the sale are cash or check and all settlements must be made at the close of the auction. All animals are 100% guaranteed in accordance with the rules and regulations set forth by the American Angus Association. A copy of the Angus Association rules will be in the office on sale day. Announcements on sale day take precedence over printed material. All persons who attend the sale do so at their own risk. Molitor Angus assumes no responsibility, legal or otherwise, for their safety or the behavior of the animals.

INSURANCE: Insurance will be available at the purchaser's option.

FRONT COVER: Molitor Complement Able 114 "Watching The Fire"

DELIVERY: Pick up your purchased livestock by Saturday, March 28, 2026 and receive a \$50 credit per head of cattle purchased and picked up. We will be happy to assist with delivery arrangements. We do offer free delivery of 3 or more lots to one location within 300 miles. Shipment is at buyer's own risk, so we suggest you insure your purchases.

LUNCH: A complimentary lunch will be served at 11:00 a.m.

All announcements from the Auction Box will take precedence over the information in the Sale Book.

PLEASE BRING THIS SALE BOOK WITH YOU TO THE SALE.

EXPLANATION OF EPD CODES

CALVING EASE DIRECT (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BIRTH WEIGHT EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

- Bulls with EPDs less than +2.0 are recommended for use on heifers. You may still have some calving difficulty, but as the value for EPD become lower, so should your calving difficulty due to birth weight become less.
- Bulls with EPDs between +2.0 and +4.0 can be used on heifers, but close supervision and management should be followed.
- Bulls with EPDs over +4.0 can safely be used on cows but are not recommended for use on heifers.

WEANING WEIGHT EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

YEARLING WEIGHT EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MATERNAL MILK EPD (MILK), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mother ability.

SCROTAL CIRCUMFERENCE EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

DOCILITY (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

CARCASS WEIGHT (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

MARBLING (MARB), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

RIBEYE AREA (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

HEIFER PREGNANCY (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

CALVING EASE MATERNAL (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

PERFORMANCE CODES

BW - Actual Birth Weight in Pounds.

WR - Weaning Weight Ratio comparing all animals weaned in a contemporary group. 100 is average.

YR - Yearling Weight Ratio comparing all animals in a contemporary group. 100 is average.

NR - Nursing Ratio - weaning ratio average of the dam's progeny.

- This symbol used with a pedigree means that particular animal is a Pathfinder and meets a certain set of strict standards set forth by the American Angus Association.

The Pathfinder Angus program was started in 1978 in an effort to identify superior cows in the breed based on their records of performance from Angus Herd Improvement Records (AHIR). In identifying these superior cows, emphasis was placed on early puberty, breeding and early performance of the offspring. In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

ANGUS MEDIA EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLink™, CAB®, Pathfinder®.

2014 SEEDSTOCK COMMITMENT TO EXCELLENCE AWARD (Certified Angus Beef LLC)

All sale cattle have
HD50K DNA Tests.

Dear Angus Friends,

Welcome to our 47th Annual Production Sale. The Molitor Ranch is a "hands on" operation and all the sale cattle have been raised and grown on our land. The day-to-day feeding of our cattle allows us to monitor their development from birth to sale day.

On our cattle ranch we try to live by and supply as much integrity as we can to raise cattle that have accurate records and pedigree history to go out and provide powerful upgrades to your cattle herds.

For the bulls, our feeding program gives them opportunity to compete against each other and exhibit their superior gain potential. Our customers indicate their satisfaction with the condition and soundness of our sale bulls. All bulls are semen checked, HD50K DNA tested, BVD Negative and have Ultrasound analysis and are ready for service.

This year's quality group of open yearling females selling were selected because they are some of the best breeding genetics in the herd. Many of the heifers selling this year are sired by breed leading AI sires and our herd bulls. These females sell with HD50K DNA tests and are in good healthy breeding condition. OCV and OPEN.

The cattle sell this year with a legacy of breeding genetics crafted over 74 years including calving ease, performance, phenotype, soundness, and gentle disposition overall. We are excited to present this year's sale group to our customers loyal and new. All cattle sell with a full guarantee backed by a program that has 74 years of experience in the Angus breed.

We appreciate the support of our customers and look forward to seeing everyone on March 21, 2026, at the Molitor Ranch or DVAuction.com. Let us know if we can be of assistance in helping you with your selection.

Mike & Susan Molitor
 All the Molitor Family

FOOTNOTE EXPLANATION

Reading the footnotes you will notice an overall theme of pointing out and denoting a value to measure competition among the sale animals. Those measures are in several forms as follows:

- Ratios:** A Ratio of 100 is average. A 105 Ratio is 105% of average and a 95 Ratio for example is 95% of average. Reference to an ADG Ratio compares the bulls for average daily gain for a period from Sept. 9, 2025 to Feb. 3, 2026 which is 147 Days. (See inside cover for more explanation.)
- Rankings among the sale Bulls or Females:** These rankings point out and compare the animals that Rank high for that EPD within their contemporary group.
- Among the breed Ranking on a percentage (%) basis:**
 - The data base for comparing the sale bulls is called a Non-parent Bull group which includes all bulls on record in the Angus breed that are non-parent bulls (majority being Yearling Bulls). That database currently is over 160,000 animals. So for example: A bull that ranks among the Top 1% of the breed for an EPD is among the top 1,600 bulls across the entire breed for that trait. In other words he is better than 158,400 bulls for that EPD.
 - The female database for our sale females is called a Non-parent Cow group. That database currently is over 120,000 animals within the Angus breed.

CATTLE SELL THROUGH THE SALE RING. VIDEOS AVAILABLE MARCH 8

All Cattle sold are free of
 known genetic defects.

PHONE ORDERS

Buyers unable to attend the sale may send their bids to the sale manager, regional manager, field representatives or auctioneer. If you would like to discuss the sale offering, call us (preferably several days before the sale), and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and pay only the bid price established by the auction. Bids are handled in confidence with a Satisfaction Guarantee on all orders.

THE 47TH ANNUAL PRODUCTION SALE

Dear Cattlemen,

Celebrating 74 years of quality Angus breeding stock, the Molitor family is offering ni their 47th Annual Production Sale a most impressive selection of both yearling bulls and heifers, rich in the finest of the Molitor heritage. The Molitor family were awarded the Certified Angus Beef Seedstock Commitment of Excellence Award more a decade ago ni 2014 or recognize their commitment to producing superior Angus seedstock. The strength of that commitment continues today.

This sale offering excels in combining calving-ease with balanced trait excellence and gentle disposition. Sires include Dynamic, Propel, Blue Collar, True Grit, Institution, Firesteel, Man In Black, Breakout, and much more.

It is a pleasure and privilege to assist Mike and Susan along with the entire Molitor family in the presentation of this grand Angus tradition. Please don't hesitate to cal on us at American Angus Hall of Fame if we can be of assistance with your selection decisions. We are here to serve.

Sincerely,

Tom Burke

GUARANTEE

In addition to the below stated guarantee, all cattle sell under the Suggested Sale Terms and Conditions of the American Angus Association.

BULLS:

1. All bulls selling are guaranteed to be breeders for the first breeding season.
Breeding season is defined as the 90-day period following the first turnout of the bulls. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm/ranch of the seller if in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to a 6 month trial following the return of the animal in which to prove that the animal is a breeder. If at the end of 6 months the seller is unable to prove that the animal is a breeder the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price.
The return of the full purchase price shall in any case be deemed full satisfaction and settlement.
2. This breeding guarantee on the bulls by the seller will apply with the exception of: (a) injury or disease occurring after the sale, (b) gross negligence or willful misconduct on the part of the buyer.
3. However, all bulls selling for \$3,500 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. Breeding injury is defined as injury to penis or preputial tear with inability to extend. If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull, less \$10 per day the bull has been in use since first turnout.
Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. Guarantee ends August 31, 2026.

FEMALES:

1. All yearling females sell as open and ready to breed.
2. Fall calving females are safe in calf unless otherwise noted on sale day.
3. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the seller if in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to six months trial following the return of the animals in which to prove that the animal is a breeder. If at the end of six months the seller is unable to prove the animal is a breeder the seller shall, at the option of the buyer, replace the animal with another of equal value, or if the buyer prefers, credit toward one female will be given in the following year's sale.
4. All claims for adjustment or refund on the females must be made by December 21, 2026. Mortality insurance on the cattle will be available at the settlement table on sale day.

What is an EPD?

The Expected Progeny Difference (EPD) is the increase or decrease in performance for a given trait that you can expect from the progeny of an animal compared to breed average. EPDs are expressed in pounds as a plus (+) or minus (-) figure.

What makes EPDs so valuable?

EPDs take into consideration the performance of the individual as well as the performance of relatives and progeny, and the within-herd ratios of contemporary progeny groups. They also factor out the management and environmental differences that may exist between herds. EPDs can accurately be used to compare bulls in different herds within the breed.
It is important to select for EPD traits that match your operational goals. If you are looking for a bull to use on virgin heifers, birth weight EPD is a primary consideration. If you keep or sell replacement heifers, milk EPD is a major factor. If your calves are sold at weaning time with no replacement females retained, then weaning EPD is of vital importance. Those of you who background your calves should concentrate on yearling weight EPD. Many times a balance in all traits is required, depending on your individual situation.
It is important to understand that EPDs are accompanied by accuracy values and may fluctuate up or down as accuracy increases.

PERFORMANCE DATA AS AN AID IN LIVESTOCK SELECTION...

Molitor Angus is dedicated to providing honest and accurate performance data to their customers. All of the EPDs listed in this sale book are official American Angus Association EPDs

calculated by Angus Herd Improvement Records (AHIR) and are current as of the date of this sale book printing. Scrotal measurements will be on the performance update sheet available sale day.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs. Better characterization of genetics for difficult-to-measure performance traits such as carcass traits, maternal traits and feed efficiency.

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered through weekly evaluation at www.angus.org.

AMERICAN ANGUS ASSOCIATION \$VALUE INDEXES

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Over time, increased selection pressure on \$W will increase pre-weaning growth through additional weaning weight and maternal milk with expenses adjustment for mature size and maternal milk.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

Cow Energy Value (\$EN), expressed in dollar savings in cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing 2 animals (more dollars saved on feed energy expenses).

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of sires.

Mature Height EPD (MH) expressed in inches, is a predictor of the difference of mature height of a sires daughters compared to the daughters of other sires.

Claw Set EPD (CLAW) is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with a more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle EPD (Angle) is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot-angle. The ideal is a 45 degree angle at the pastern joint with appropriate toe length and heel depth.

Teat Size EPD (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

Udder Suspension EPD (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

Functional Longevity EPD (FL), expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

NATURAL SERVICE SIRES

The Molitor Natural Service Sires you see throughout this sale book positively compare in genetic strength to the AI sires we use and complement those bloodlines. Remember that we have raised the calves that were born to these service sires to determine their future contribution to the herd genetics of 74 years here at the ranch. We travel many miles each year to evaluate over 1000 bulls on an "eyes on" basis and add 1 to 2 bulls a year to our operation. Many of the bulls we see are at the Midland Bull Test because those 500 to 700 animals come from elite registered Angus herds from 26 states and represent the newest genetics anywhere! Also, many of the Top AI Studs in the country are located in this region. Be confident that our efforts will make your life easier and improve your bottom line.

Susan & Mike Molitor

Prem Summary

Choice	20.62
Prime	13.61
CAB	4.33
CHB	2.00

Although this Close Out is not on a large number of steers, if you combine the Close Outs of all the Molitor Steers fed in recent years the results are outstanding. Those three years of results show all 77 steers that were fed graded 100% Choice or Higher. No Selects. These actual feedlot results confirm our commitment to using genetics that increase our carcass trait qualities and still produce a great feeding outcome. We have resisted the idea of chasing extreme carcass trends that we feel produce cattle with less lower body mass and muscle, have ease of movement problems because of structure issues, and in some bloodlines, problems of fertility and docility.

This Dynamic son had the high weaning and yearling weight among the sale bulls with a WR 122 and YR 114. His EPD profile is very unique with a CED EPD in the Top 15% of the breed yet Top 10% for WW and YW EPDs. He ranks 8th among the sale bulls for both Docility and Angle EPDs. The dam is our top producing daughter of HARB Playboy 581JH with a WR 112 on 3 calves. The grandam is a Pathfinder female. A high growth and docile bull with calving ease, high scrotal value, great foot quality, and strong maternal traits. ADG Ratio 105. Selling 1/2 interest and full possession.

Dynamic is a highly proven sire calving ease sire that is a genomic standout with 3035 Genomic Progeny on record. He has a powerful physical presence with width, thickness and dimension in an attractive package. His EPDs for WW and YW will continue to rise as currently he has 3334 progeny Ratioing 103 for Weaning and 1709 Progeny at 103 for Yearling Weight. His Marbling carcass indexes Rank in the Top 15% of the breed. He's Top 15% for Teat and Top 10% for Udder scores on 152 cows. The six Dynamic daughters we have in production are proving to be true powerhouses; all breeding on their first cycle and averaging 8 days early on calving due dates.

Propel is a stout, moderate framed bull with great muscle expression and Docility. We have been extremely pleased with his genomic progeny on record at 136. He has 124 calves on record with a WR 101 and 110 calves with YR 102. His pedigree shows great sire genetics such as Resource, 999, Consensus 7229, and Connealy Onward. The dam is a high producing donor cow with 8 daughters in production ratioing 104 on their calves for weaning. The 29 daughters of "Propel" are on record with a WR 102 on their calves. His Functional Longevity (FL) value of +1.15 ranks in the Top 10% of the breed and is an indicator that his daughters will remain in the herd for an extended length of time. Co-owned with Dix Angus Ranch.

Another bonus is that he ranks 1st for Teat scores and 2nd for Udder Quality among the sale bulls. ADG Ratio 105.

RETAINED INTEREST EXPLANATION

We will be retaining a revenue sharing interest in several bulls that sell. This means that you will receive full possession and salvage value in the bull. Our retained interest gives us the right to use the bull by AI and share in semen sales of the bull. Semen will be collected at your convenience and all fees associated with collection will be shared by interest owners. We feel that bulls you purchase from us and are later so-called discovered by the industry will be an economic windfall deserved by the bull owners. If we have not retained an interest in these bulls at the sale, we may be willing to buy back an interest in those bulls, on your terms.

If you are looking to add carcass value in your herd, this is the number one bull in the sale for \$Grid. Also Top 25% or better in the breed for BW, Scrotal, Angle, HP, Marbling, \$Wean, and \$Beef. Top 10 in the sale for Teat and Udder quality. ADG Ratio of 119 is 5th highest.

SALE ORDER

In an effort to provide our customers with an equal opportunity to purchase the same quality bulls from the start of the sale to the finish, we have implemented a unique sale order approach. After a few highlight bulls sell, most of the bulls in this sale will be sold in sire groupings to provide the same quality bulls from the start of the sale to the finish. This will allow our customers who purchase bulls late in the sale an equal opportunity to bid on bulls of the same caliber as in the early portion of the sale, each time a new sire grouping starts. This also assists customers who are trying to select groups of brothers for a more uniform and consistent calf crop. To assist our customers planning their bidding and buying decisions, the sale order for each sire group will be available sale day as well as the order in which the sire groupings will sell.

+11	-2.0	+67	+120	+30	+89	+27	+74	+107	+84	+192	+314

This Calving Ease bull produced the top gaining sire group in the sale. He is at the Top 15% for CED, Top 5% for BW, Top 25% for Milk and Top 10% for Teat, Top 20% for Docility, Claw Top 25%. Notice his carcass traits, \$Beef, \$C and CEM in the Top 15% of the breed. We observed this Powerful bull in Montana where he is a high volume semen producer with extensive semen sale for use in "heifer breeding projects". He is the first natural son of his Pathfinder dam having a WR 106 on her 4 calves. "True Grit" has 733 genomic progeny on record and is proven to add thickness and muscle to his progeny. He should have easy fleshing daughters that milk well with teat and udder quality. ABS Global bull.

• This bull has outstanding calving ease combined with a powerful performance phenotype, coming in at top 1% of the breed for CED and BW. He is top 4% and top 10% respectively for Claw and Angle. Docility at top 25% with RE and Marb at top 5% and 35% respectively. A \$C at top 10% followed by a \$B at 20%. We observed this bull as a yearling when he first entered the stud in Montana and he has continued to develop into one of the most complete bulls of the breed with a classic "herd bull" conformation. He is a great grandson of the famous Connealy Black Granite, Basin Advance 3134 and Ellingson Chaps 4095 all of which are sires we used in our program over the years with great success. He has calving ease, foot and carcass quality; with \$Maternal, \$Weaning and \$C indexes in the top 10% of the breed. An ABS Global bull.

SONS OF HF SAFE & SOUND 019

EPDS ARE COMPARABLE

EPDs can accurately be used to compare bulls in different herds within the breed. EPDs take into consideration the performance of the individual as well as the performance of relatives and progeny, and the within herd ratios of contemporary progeny groups. They also factor out the management and environment differences that exist between herds. The Molitor Bulls selling have average EPDs that rank in the Top 20 % of the breed for CED and BW. Many of the individual bulls selling will rank in the Top 1% of the breed.

We were impressed by the phenotype of this bull when we saw him in Montana. He combines eye-catching conformation, masculine design and flawless structure with some of the breed's most outstanding maternal genetics. He is revered by many as KG Justified's greatest son. "Firesteel" is backed by generations of proven, predictable maternal strength. This bull is ideal for use in registered and commercial herds to create the next generation of feminine, big bodied, easy-keeping females with outstanding foot quality and genetics to reduce mature weight and height with a Top 15% \$EN value. His BW is at Top 10%, Milk Top 25%. Claw Top 4%, Angle Top 35%, Marb Top 30% and Maternal value at Top 20% for \$M. Genex Bull.

SONS OF LD DUALY 0181

★★ HOW THE BULLS ARE HANDLED ★★

The bulls and their dams are moved to large pastures in May and remain there until October. In October, they are weaned together in one large group. Then from November 15 to March 1, they are bunk fed at the Molitor Headquarters with a high roughage diet set for a gain of 3.0 lbs. per day. A final weight will be taken on about March 1 before they are run together on grass in one large pasture and remain there until sale day. Yearling weights were taken on February 3, 2026. In an effort to maximize bull health and foot soundness, the bulls received limited supplement this summer after weaning weights were taken in September. At weaning, we were careful to limit their grain intake and have continued this policy and the total bull health has been excellent.

• Incredible 281 is a maternal brother to our Growth Fund Reference Sire N Herd bull. The dam of both sires is the great donor cow, Werner Lady Jaye 6222 with 33 genomic progeny on record. He came from the 2023 Midland Bull test as a featured high performing bull from Deppe Angus in Iowa. His sire, Panther CR Incredible 6704, has developed into one of the high growth performance bulls in the breed with a WR 104 on 375 calves and a YW 103 on 238 head. On the maternal side, his 249 daughters on record show a WR 103 on 647 calves. "Incredible 281" ranks in the top 3% of the breed for WW, Top 10% on YW, CEM at top 2%, PAP 10% and 2% for \$Wean. Along with his powerful phenotype his genetics show top 15% for Docility and CW. His first daughters in production are outstanding with great maternal instincts and udder quality.

Windy is a heavy muscled, thick bodied, straight topped bull with an even tempered and gentle disposition. He was one of the high selling bulls at the 2021 Midland Bull Test where he indexed 116 with an ADG Ratio of 124. His sire is also a Midland graduate and a MBT index of 109. "Windy" is a great growth performance and high maternal bull with EPDs top 10% or better for WW, YW, Milk CW, \$Wean and \$Feedlot. He also ranks top 25% or better for Docility, SC, HP and \$B. His daughters in production have an average WR of 105 on their calves. Co-owned with Windy Ridge Angus Great Falls, Montana.

He has consistent values for both Calving Ease and Growth. Top 20% or better in the breed for CED, BW, WW, YW, HP, Milk, and \$Wean.

WHAT MAKES THE MOLITOR HERD UNIQUE

- The herd is patterned after our vision of the ideal Registered Angus
- Sound, correct footed and long bodied with enough volume to convert roughage, conducive to our environment.
- The females are feminine but powerful enough to produce masculine bulls.
- The bulls are masculine, thick and muscular but still refined fronted and long necked for calving ease.

He will improve foot quality with the 9th high value for Claw EPD among the sale bulls. Top 25% for \$EN. A look at his pedigree shows his grandam, Molitor Conn Eleanor 005-2002, produced the High Evaluated Fall Bull at the OK&T Sale two years in a row. Those sons were sired by two different herd bulls.

BEFORE YOU DECIDE WHETHER OR NOT TO USE YEARLING BULLS, CONSIDER THESE FACTS:

- You're Buying the Very Best!**
Yearling bulls haven't been picked over and the yearling bulls offered are the very best from their calf crop at both weaning and yearling time. If they are not the best, they would not be offered to you now.
- Younger Bulls are Easier on Heifers!**
And they're easier on cows and each other, too. Handled and used properly, yearling bulls will work longer for you.
- You Can Usually Buy Them Cheaper!**
Yearling bulls often sell for 30 percent less in total dollars than comparable quality two-year-old bulls. PLUS you can develop them as YOU see fit.
- Yearling Bulls May Not be for Everyone!**
But, if you can adjust your program to yearling ANGUS bulls, we can offer you better quality bulls, with the same genetics to sire more pounds for less money and improve your profit potential. Think about it in terms of dollars and sense.

• DAR Plus One 1225 is sired by E&B Plus which we have used with success. This son is out of a Pathfinder dam and Pathfinder granddam that traces back to the famous Dixie Erica cow family. He is a grandson of KG Solution 0018 which we used extensively in our program for years. "1225" is a high Docility bull in the Top 10% of the breed for Doc and WW. He is Top 20% for YW and Top 15% FOR \$Wean. He has strong values for both Marbling and Ribeye which translates to a Top 25% for \$Grid. The Pathfinder dam has a strong production record of WR 109 and YR 106 on 4 calves.

THE PATHFINDER OPPORTUNITY

Molitor Angus has one of the largest numbers of Pathfinder Cows as any Registered herd in Kansas. Those females excel in fertility and progeny performance.

To be a Pathfinder, a female has to have the opportunity to reach that status. At Molitor Angus, every female starts out with the opportunity. Starting about April 10th, we start breeding our replacement heifers on a natural cycle basis. About May 20th, all heifers are put to grass with a pasture bull.

Two-year-old cows with their first calves are all put to grass in mid-April for natural service. This group of 60 head are used to help prove our young herd sires by getting at least 15 progeny each from those bulls.

Three-year-old and older cows that calve before February 25th are AI'd on a natural cycle basis for about 30 days and then put to pasture.

At Molitor Angus, genetics do play a role in developing a Pathfinder Cow but you must give that cow the opportunity to show her potential.

The Pathfinder Angus program was started in 1978 in an effort to identify superior cows in the breed based on their records of performance from Angus Herd Improvement Records (AHIR). In identifying these superior cows, emphasis was placed on early puberty, breeding and early calving, followed by regularity of calving and above-average performance of the offspring. In addition, bulls that have sired a minimum of five or more Pathfinder Cows are listed as Pathfinder Sires in this report.

• Cherry Creek Blue Collar G275 has 1143 genomic progeny on record with Calving Ease EPD of +18 at top 1% of the breed on 392 calves. Birth Weight (BW) is -1.6 on 1210 calves coming in at top 10% of the breed. He ranks top 15% on Docility (Doc); while Claw and Angle come in at top 10% and 25%. A high altitude bull with PAP (Pulmonary Arterial Pressure) EPD at Top 3% of the Angus breed. A reported trait that may also help with severe heat weather. His RE and Marb scores on carcass come in at top 2% and top 25% respectively. Overall \$B at Top 25%. A docile ABS bull that is designed to breed heifers with terminal progeny that will excel at altitude or heat situations without sacrificing yearling performance, muscle and carcass quality.

• Propel is a stout, moderate framed bull with great muscle expression and Docility. We have been extremely pleased with his genomic progeny on record at 136. He has 124 calves on record with a WR 101 and 110 calves with YR 102. His pedigree shows great sire genetics such as Resource, 999, Consensus 7229, and Connealy Onward. The dam is a high producing donor cow with 8 daughters in production ratioing 104 on their calves for weaning. The 29 daughters of "Propel" are on record with a WR 102 on their calves. His Functional Longevity (FL) value of +1.15 ranks in the top 10% of the breed and is an indicator that his daughters will remain in the herd for an extended length of time. A powerful proven herd bull owned with Dix Angus Ranch, Stockton KS.

• This Calving Ease bull produced the top gaining sire group in the sale. He is at the Top 15% for CED, Top 5% for BW, Top 25% for Milk and Top 10% for Teat, Top 20% for Docility, Claw Top 25%. Notice his carcass traits, \$Beef, \$C and CEM in the Top 15% of the breed. We observed this Powerful bull in Montana where he is a high volume semen producer with extensive semen sale for use in "heifer breeding projects". He is the first natural son of his Pathfinder dam having a WR 106 on her 4 calves. "True Grit" has 733 genomic progeny on record and is proven to add thickness and muscle to his progeny. He should have easy fleshing daughters that milk well with teat and udder quality. ABS Global bull.

• This bull has unique genetics of calving ease and growth performance in the top 20% of the breed. He was raised by the well known breeder, Les Craft, and sold in the 2024 Midland Bull Test where he ratioed 106 for ADG against 470 Angus bulls. He ranks in the top 10% of the breed for HP, Udder quality, Functional Longevity (FL), Docility, PAP, Marbling, \$Grid, and \$C. He is sired by the proven sire, Baldrige Versatile, and traces back to some well known maternal sires such as Hoover Dam and KG Justified 3023.

• This bull is a "knock your socks off" heifer bull with outstanding calving ease combined with a powerful performance phenotype, coming in at top 1% of the breed for CED and BW. He is top 4% and top 10% respectively for Claw and Angle. Docility at top 25% with RE and Marb at top 5% and 35% respectively. A \$C at top 10% followed by a \$B at 20%. He is one of the most complete bulls of the breed with a classic "herd bull" phenotype with superb quality and balance with an elite maternal package. He is a great grandson of the famous Connealy Black Granite, Basin Advance 3134 and Ellingson Chaps 4095 all of which are sires we used in our program over the years with great success. He is an all around standout for calving ease, foot quality and carcass quality; with \$Maternal, \$Weaning and \$C indexes in the top 10% of the breed. An ABS Global bull.

+14	+4	+79	+138	+32	+1.34	+22	+87	+109	+57	+167	+296

• 103H has been a great Calving Ease breeding bull in our herd with a CED in the Top 4% of the breed and growth EPDs of WW at top 20% of the breed and YW at Top 25%. His bull progeny show strong Scrotal trends and high HP values that rank in the top 25% of the breed. His first daughters in production show weaned calves at an average of WR 105 with Milk EPDs in the Top 15% of the breed. "103H" has 69 Genomic Progeny on record.

• We were impressed by the phenotype of this bull when we saw him in Montana. He combines eye-catching conformation, masculine design and flawless structure with some of the breed's most outstanding maternal genetics. He is revered by many as KG Justified's greatest son. "Firesteel" is backed by generations of proven, predictable maternal strength. This bull is ideal for use in registered and commercial herds to create the next generation of feminine, big bodied, easy-keeping females with outstanding foot quality and genetics to reduce mature weight and height with a Top 15% \$EN value. His BW is at Top 10%, Milk Top 25%. Claw Top 4%, Angle Top 35%, Marb Top 30% and Maternal value at Top 20% for \$M. Genex Bull.

• Windy is a heavy muscled, thick bodied, straight topped bull with an even tempered and gentle disposition. He was one of the high selling bulls at the 2021 Midland Bull Test where he indexed 116 with an ADG Ratio of 124. His sire is also a Midland graduate and a MBT index of 109. "Windy" is a great growth performance and high maternal bull with EPDs top 10% or better for WW, YW, Milk CW, \$Wean and \$Feedlot. He also ranks top 25% or better for Docility, SC, HP and \$B. His daughters in production have an average WR of 105 on their calves. Co-owned with Windy Ridge Angus Great Falls, Montana.

• Magnitude has genetics that excel in many important traits for herd improvement. We have been impressed by his proven Calving Ease and Growth performance that Ranks in the Top 20% of the breed for CED, top 10% for TW and top 15% for WW and top 20% for BW and top 5% for YH. His maternal strength is outstanding with a Top 1% in the breed for CEM, Milk, and \$Wean EPDs. The outstanding CEM at top 1% is important because it means that this is a predictor of the percentage of unassisted births of the daughters of this bull. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to other sires. His 884 daughters have 1715 calves on record with Weaning ratio of 103 on their calves and have udder quality in top 205 of the breed. Magnitude has 2607 Genomic progeny on record. An ABS Global Bull.

Thanks to the Helpers

It takes a lot of help for an operation this size and we thank our employees who worked this year: James Herman Lintel, Brandy Nulik, Austin Kinsler, and Gary Novak. Harvest Help was also Ed Huelskamp.

Specialized Service Individuals we want to recognize are: Dr. Larry Bush (Heartland Vet), Redland Veterinary Services, Western Feed Mills & Zenda Co-op (feeding systems).

Also, I appreciate the assistance throughout the year of my sisters: Sandy, Connie, Marsha, Debbie, Nancy, and Lisa. Their husband's tireless support: Doug Walbridge, Bud Oak, Mike Strothman, Mike O'Brock & Mike Dailey.

*Thanks so much,
Mike & Susan Molitor*
